RESIDENTIAL EXTERIOR DOORS DESIGN - MANUFACTURE - INSTALLATION

Gaffco Ballistics, LLC has been protecting companies, private citizens, and government personnel through the design, manufacture and installation of safe rooms, bullet-resistant systems and ballistic security for over 30 years. We deliver products of the highest quality to help ensure the safety, security, and protection of clients, their families, employees and property.

Gaffco Ballistics can advise, design and specify best practices to provide a high level of protection and security for corporate clients, high net worth individuals, their families and guests. We work directly with our clients' architects and general contractors to replicate their sophisticated design while providing secure areas within the offices and a safe refuge for clients and employees.

In our years of experience in this niche industry, we have developed some proprietary products and have selected only the best manufacturers that build bullet resistant products to our specifications, using our designs, recommended processes and only materials that have passed ballistics rated tests.
